*Drawings*

1. The drawings were received on 12-9-2005. These drawings are accepted.

*Allowable Subject Matter*

2. The following is an examiner's statement of reasons for allowance: upon close review of the claims, the prior art, and applicant's remarks it appears that the allowance of claims 1-21 are appropriate.

The telecommunications network of U.S. Patent No. 5,839,072 by Chien is functionally equivalent to the claimed telecommunications system because the system includes a supplementary telecommunications service (e.g. number portability system) and determining if a second station is ported when a first station (wireline terminal or other terminal) initiates a call to a second station (mobile station). If the second station is ported, the call is routed to the second station. Although Chien teaches a number portability system (col. 6, line 16 – col. 7, line 67), Chien fails to teach informing at least one supplementary telecommunications service of the results of said determination during a phase that is before a phase in which the set-up procedure is completed and before provision of said at least one supplementary telecommunication service for said first station is initiated.

The telephony system of U.S. Patent No. 6,411,703 by Martinez et al is functionally equivalent to the claimed telecommunications system because the system includes a supplementary telecommunications service (e.g. local number portability), determining if a second station is ported when a first station (wireline terminal) initiates a call to a second station (wireline terminal), and providing a supplementary telecommunications service (e.g. toll call) to the first station. If the second station is ported, providing a call announcement to the first station

Art Unit: 2645

that the call is a toll call and if the first station accepts, the call is routed to the second station.

Although Martinez teaches local number portability (Fig. 23; col. 11, line 60 – col. 12, line 17), Martinez fails to teach the number portability service facilitating porting of stations from a first telecommunications network to a second telecommunications network.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
